TELEGRAPHIC**A BALTIMORE BURST.****Boiler Explosion Kills Many
People.**

Baltimore, 13.—A large boiler in a building on Pratt street, next to the corner of Fremont, exploded this afternoon with terrible loss of life. The immediate part of the building where the explosion occurred, was occupied by A. H. Sibley & Co., as a chop and feed mill, and the floor above and first floor, adjoining, on King street, by Miller & Coleman, as a sash and door factory. The machinery had been idle for some time, for repairs, and the fire had just been started to resume work, when the explosion occurred. A portion of the boiler was propelled northward, entirely demolishing two two-story brick dwelling houses on King street, throwing down a side wall in the rear of a building adjoining. At the time of the explosion John Addison, engineer, Harrison Waters, colored fireman, Andrew Cooper, machinist, who had been making repairs, and Frank Kramling, boy, when in the engine room, and all killed, except Cooper, and he is not expected to live. In the house 173 King street, George Pentz, aged 19, was killed; Ida Rosenberg, leg broken; Ellen Krawlings, colored servant, severely hurt, by coals falling upon her; in No. 171 King street Grace Gray, aged 20 years, killed; in the yard adjoining the factory Abraham Hepburn (colored) while unloading a lumber wagon, was struck by the flying missile and had his skull fractured; James Roden, age 15, skull fractured; Margaret Kauf in the street adjoining the factory was killed at the wash tub in the kitchen by flying brick; C. W. Gates, at work in the granite yard, a square distant, was struck in the face by brick and severely hurt; Edward Kelly, employee in the building, leg broken. Several others were less seriously hurt. Several bodies are supposed to be still under the ruins including those of the engineer, fireman and the boy Kramling. The firemen are endeavoring to recover them. The damage to property and machinery is estimated at about \$8,000. There was a similar explosion in the same building twelve years ago when five persons lost their lives.

Irishisms.

London, 13.—The Times considers the tory demonstration at Liverpool, last night, a political event of the first importance. It concurs with the Marquis of Salisbury in the assertion that were Ireland subject to the rule of Germany, France or the United States, organized crime would be promptly and permanently stamped out.

O'Donnell, member of Parliament for Dungarvan, published a long letter in the Times under the head "The Cure of the Irish Difficulty," in which he maintains that the question of arrears is one question, to which the good of Ireland ought to turn special attention. If neglected then farewell hope, peace, progress and contentment.

Dublin, 14.—The bone placed upon the publication of *United Ireland*, is apparently removed, as the paper is sold openly in the streets. Its moderate tone continues.

Dublin, 13.—A returned American named Deslin, was arrested on suspicion of having shot one McGovern, keeper of a public house in Keadane, near Boyle.

Howgate Gone.

Washington, 13.—H. W. Howgate, for some months in jail in this city on account of inability to procure the amount of bail required for his appearance to answer the charges made against him in connection with his administration of the financial affairs of the United States Signal Service, escaped from his guard to-day while visiting his family by courtesy of Judge Wyle. Howgate stepped from the room while the bailiff's back was turned, and the officer running frantically out after him was unable to discover his hiding place. The house was searched and the police notified, but up to 11 p.m. nothing was found. Marshal Henry thi as he is still in the city, but as a precautionary measure the police authorities of Baltimore, Richmond, New York, Philadelphia and Boston have been notified. If not arrested before to-morrow a reward of \$500 will be offered.

Business Failures.

New York, 14.—The business failures for seven days, as reported to R. G. Dun & Co's commercial agency, number 122, as follows: Southern states 38, western 34, middle 19, eastern 22, pacific and territories 8, New York city 6. The Poughkeepsie iron and steel company have suspended, as also the New York and Boston manufacturing company. The other failures in this city are unimportant.

Buffalo, N. Y., 14.—The first national bank has closed its doors. A large number of drafts issued to livestock dealers, drawn on the fourth national of New York, on the 4th inst., and since that date, were yesterday dishonored in New York. The extent of the drafts unpaid cannot be ascertained now, but it is thought large. The failures will seriously affect a large number of cattle dealers, who sent these drafts in payment for stock sold by them. It is believed that depositors will be paid in full.

Importation of Opium.

Washington, 13.—A circular has been issued by the secretary of the treasury calling the attention of collectors of customs to article two of the treaty with China, proclaimed October 5th, '81, which prohibits the importation of opium into the United States by Chinese subjects, or into China by citizens of the United States. Customs officers are directed to see that the prohibition is strictly enforced. In the case of the importation of opium already shipped, the department, on special application, will decide what measures should be taken for the remission of the forfeiture incurred.

A Flood.

Pargo, D. T., 14.—The flood has done great damage here, estimated at \$108,000. The mud is knee deep all over the city. John Woodland's warehouse is under water with \$10,000 in farming implements; the Union elevator is in danger of falling with its costly store of wheat; the Grand elevator is half under water and basements are universally flooded.

The Chinese Nobs.

New York, 13.—The Chinese minister visited Governor's Island yesterday, upon the invitation of General Hancock. He was accompanied by his secretary. They were both dressed in colored silk, and wore their little mandarin hats with a red button on top. Upon landing at the island they were met by Captain Guenther, commander of the post, and other officers of the garrison, and conducted to Hancock's house, where they were formally welcomed by the general. As they passed the guard house, the guard turned out and presented arms. The whole party then proceeded to inspect the fortifications of the island. When they arrived at the south glacis of Fort Columbus a salute of fifteen guns was fired by a light battery. After the salute the party proceeded to the ditch of the Fort, where was one of the Gardner machine guns. This gun is worked by a crank, and the number of shots it can fire per minute is limited only by the rapidity with which the crank can be moved. The highest number ever attained is 500 a minute. The gun having been loaded and discharged, and its mechanism explained to the minister, he was invited to try his hand at firing it. Tucking up his voluminous sleeves the Mandarin revolved the crank of the murderous instrument with a velocity that astonished the interpreter in the machine. Then he said, through his interpreter, "Good gun." After this the party were entertained at luncheon by Hancock, at his residence. When the minister and his suite left the island they were accompanied to the boat by a crowd of officers. The guard turned out and stood with presented arms.

Another Storm.

Morgan City, La., 13.—This section was, last night, visited by a most terrible storm, causing the water to rise and destroying an immense amount of property. The Ramos railroad bridge was carried away, and at Drew's mills about twenty dwellings were destroyed, only one house remaining standing. In Bayou Teche cabins and other small buildings were destroyed on nearly every plantation. In Berwick a school house was blown from its foundation, and two colored men were killed by falling timber. Many persons had a narrow escape from drowning. The destruction of live stock is very great through a large section of country. The sugar house of Francois Bougere, in St. Charles parish, was blown down and a negro killed.

On the Gay and Daigre place last night a sugar house was blown down. Nothing can be heard of eleven white refugees who occupied it. They were J. C. Vinton, his mother, brother, wife and child; Mr. Hopacker, his wife, two children and unknown persons. All the furniture was found destroyed, but as no bodies have been discovered, it is hoped the people fled to the woods before storm broke. Attempts to close Landry crevasse were abandoned when it was found that twenty-five feet of plings were carried by last night's storm. Wool Fork, Shady Grove, Augusta, Trinity and Daquin place are under water. The loss to the sugar crop at Plaquemine is about 3,000 hogheads. The loss of stock at other places is very heavy.

What the Republican Caucus Proposes.

Washington, 13.—The inability of the dominant party to complete legislation without the assent of the democratic minority is made apparent daily. The republican caucus will be asked to enforce for the rest of the session strict party discipline. It is probable a notice will be given for all pairs to be dissolved. Such course is necessary to secure a quorum of republicans. There are now from twenty-five to thirty republicans absent and as long as they continue away democrats can by simply refusing to vote leave the House without a quorum.

Three measures will be named by the caucus as imperatively demanding the presence of all republican members to secure their passage, i.e. the tariff commission, the new Chinese bill, and the settlement of contested election cases. It is proposed to stop debate on the former next week, then pass to Page's bill to exclude Chinese for ten years, then seat Lynch instead of Chalmers from the sixth Mississippi district, Lowe instead of Wheeler from the eight Alabama district, and Mackey instead of Dibble from the second South Carolina district. These are the chief election cases likely to be pressed to a vote this session.

Hubbell, chairman of the republican congressional campaign commission, is very earnest in his appeals to republican members to be present at the caucus and take decided steps towards bringing the party into a better state of discipline.

International Trouble.

San Antonio, Tex., 12.—A telegram from Laredo announces that the Mexican authorities have stationed several companies of infantry along the Rio Grande opposite the city, and refuse to allow Americans to cross. The trouble is caused on account of the United States authorities holding and refusing to give up a large number of cattle belonging to a Mexican ex-pan that strayed across the river while the water was low a few days ago. The fact of the case have been reported to both governments.
